More information

[Festival's program](#)

Senssa Teatro performs an adaptation of the greek tragedy by Euripides at the Festival International de Théâtre de Mont-Laurier.

The [Festival International de Théâtre de Mont-Laurier](#) is a 7-day immersion in the various comic, dramatic and absurd universes of theater companies from 20 different countries –a cultural mosaic of art and creativity.

SENSSA TEATRO

This [Spanish Theatre Lab](#) is a theatrical project marked by the artistic restlessness of its members who aim to create poetic universes through the communicative potential of their bodies and their voices. Hence the necessary combination in their shows of different techniques and scenic disciplines: physical theater, texts, dance, acrobatics or singing. The total involvement of the actors, based on their commitment to training, generates a powerful energy, an emotional and physical force.

LES BACHANTES

Les Bachantes of Euripides is considered one of the best tragedies ever written for its intelligent dialogues, shocking situations, analysis of the irrational feeling and, above all, its analysis of human duality.
